
Mr. & Mrs. M. & Drs. C. & U.

Mrs. M. was employed by Children's Hospital for 10 years before Fibromyalgia, a syndrome characterized by chronic pain in the muscles and soft tissues surrounding joints, became too painful for her to continue working. Mr. M. worked at a meat packing plant before his medical conditions prevented him from continuing; he was came to to DDS because a routine tooth infection was preventing him from being placed on the kidney transplant list after being diagnosed with end stage renal failure. Mr. and Mrs.M. incurred significant debt because of mounting medical costs, the result being that neither had the financial ability to maintain their dental health. For Mr. M, it prevented him from a life saving operation.

Mrs. M.'s treatment consisted of routine dental work, complemented by a night guard that Lone Tree Dental Lab. donated. Willy had several infected teeth removed and was fitted for dentures, that were donated by Espara Dental Frames Inc.

Through the kindness of Drs. C. & U., Lone Tree Dental Lab and Espara Dental Frames, Mr. and Mrs. M. now enjoy much improved dental health.
